ABSTRACT

Introduction

Welcome to our GlowKare Website, where beauty meets innovation! Dive into a World of transformative skin care routines inspired by the Korean beauty philosophy. This website is specifically designed for users who are interested in buying Korean skin care products. From gentle cleansers to potent serums and indulgent sheet masks, our collection showcases the best of Korean skincare innovation. Join us on a journey to unlock the secrets of GlowKare and unveil your inner glow.

Existing system

The existing online Korean skincare products platform offers a comprehensive product catalog with advanced search and filter options to help customers find the best deals. It includes personalized recommendations based on user profiles and purchase history. A unified shopping cart and multiple payment options streamline the checkout process. Users can leave reviews and ratings, and track orders in real-time. Additionally, the platform provides live chat support and secure transactions to ensure a seamless shopping experience.

Proposed System

The purpose of this website is to allow customers to buy Korean skincare products in an easy manner. The data, such as personal details, delivery location, bank details, etc., would be kept in the database. The sellers should also register and login; the products they sell, the stock details, etc., are all included in the database. Users can view different products from different brands, add them to the cart and pay online using a debit card and internet banking.

Modules:

    Admin :

- The admin has the supreme power of the system.
- The admin controls what should be sold on the site.
- Admin can manage sellers by adding new sellers or editing the existing sellers and also viewing the profile of the seller.
- GlowKare should allow the admin to log in to the system.
- The admin enters valid Username, Password and then goes to the admin home page otherwise displays error messages like invalid username or password.
- Admin can manage the category, that is they can add, edit, list or remove the category.
- Admin can manage complaints from sellers.
- Admin is responsible for maintaining and updating the whole system.
- Admin can check feedback and reviews from the customers.
- Admin should notify the seller for any order of product made by the customer and should also notify the seller if a product is running low and if it is out of stock.
- The admin can manage us and contact us pages.

Seller
- Initially the sellers have to sign up.
- GlowKare shall allow the Seller to log in to the system.
- The Seller enters the valid username and password then goes to the seller home page otherwise displays the error messages like invalid username or password.
- The Seller should post their product details and upload images of their product.
- The Seller should be able to view the details of the customer who made an order.
- The system should allow sellers to add, edit, and remove products from their inventory.
- Sellers can see all details such as the total no. of orders received for each product, the total no. of orders delivered, the total no. of orders canceled, payment details etc.
- The sellers should update their stock if new stocks are available.
- The Seller can request to the admin for adding items in case their product is not in the given categories.
- Sellers are able to edit/update their personal details whenever they need.

Customer

- The customers can browse around and view products as they like.In order to buy a product, the customer has to sign up.
- GlowKare shall allow the Customer to log in to the system.
- The customer enters a valid username and password then goes to the customer homepage. Otherwise, display the error message like invalid username or password.
- The customer can add products to their cart according to their wish and place them through online payment.
- The Customer can see the product catalog with detailed information (e.g., name, price, ratings, images) for various products they select.
- The customers can add reviews about the products they purchased.
- Customers can add the products into the wish list if they are not planning to buy them soon.
- Customers should be able to search and browse products based on different criteria (e.g., brand, price range).
- The customer can update their personal details when they want.

Dermatologist

- Users can book appointments with dermatologists for personalized skincare advice.
- They can view and respond to patient reviews and ratings to improve service quality.
